

CORMACK PACKAGING

A TRICORBRAUN® COMPANY

GLOBAL INDUSTRIAL PACKAGING

Cormack Packaging a TricorBraun Company, is involved in the manufacture and supply of many forms of packaging around the World. This includes Plastics, Glass and Metals. This starts with basic flat caps, through multi piece dispensing caps and all the way up to plastic Sprays and Dispensing pumps and now includes the matching containers as well.

We continue to be the sole Tri-Sure distributor and manufacturer in Australia and New Zealand.

Our Penrith Facility is the base for all our Tri Sure range:

- Our Metals manufacturing of steel fitment and closures
- The Traded Tab Seals, closure systems, tools and fitments from around the globe for steel drum manufacturing and re-conditioning
- Traded fitments, bungs, plastic caps and accessories for Plastic Drum and Pail manufacturers

TricorBraun has been involved in containers for 120 years, Tri-Sure has been developing closure solutions for 90 years and Cormack Packing has been in packaging for 80 years as a local operation. That's a combined 290 years of technical experience to support your Brand and Products. This allows us to not only supply your packaging but to technically support you in its development and use in your facilities.

TS60 Press -In Closure

The TS60 Press -In Closure is a plastic closure system for 57 DIN Openings on Closed Head Drums.

The system combines a plastic screw-cap, a press-in neck with easy-tear membrane, and optional venting for hot-fill applications.

Made at Cormack Packaging's Penrith plant in Sydney Australia

TS60 Press-In Closure

How does it protect?

The TS60 Press -In Closure is designed for ease of use and security. It is an all-in-one solution, ensuring simple and correct installation for quality protection. The tamper-evident, ring-pull membrane must be removed before pouring. The screw cap is lightweight yet durable and comfortable to use. Easy re-application effectively reseals the contents of the container.

Ensuring Maximum Security Worldwide

Combined with Tri-Sure Closures global network of sales and service centers, technical support and tooling, the reliable TS60 really is the first choice for companies that value the ultimate solution for protecting their quality contents.

Options

- Optional ventilation for hot-filling applications

Thoughtful Design

The oversized and cantilevered pull ring facilitates comfortable and easy tearing of membrane.

Quality material, pleasing finish and smooth, secure turning action and engagement speak volumes for the quality of the product sealed with a Tri-Sure TS60 Press-In Closure.

Ergonomic grip formations on a low-profile cap ensure the cap can be reliably and safely re-applied by hand to protect the remaining contents and the environment, and to minimize waste.

Advantages

- ✓ Integrated closure solution simplifies installation and ensures proper operation.
- ✓ Low-profile cap facilitates drum stacking.
- ✓ Consistent Press -In design for automatic filling line application.
- ✓ Tamper evident.
- ✓ Optional vent for hot-filling of drums.

The first impression of a quality product should never be a difficult, uncomfortable or ineffective closure. Packaging frustration can drive even loyal customers away from a good product. The TS60 Press -In Closure ensures the user is fully satisfied with the entire experience of using your product.

As expected of the world leader in industrial closure systems, we provide a complete system to support application and removal of TS60 Press -In Closure. Our technical staff can also offer practical advice on achieving optimal sealing and upgrading your current container with the TS60 Closure System.

CORMACK 44MM PAIL FITTINGS

ITEM NO.	PRODUCT DESCRIPTION	QTY/CARTON (1,000'S)
SCNN4010	44 INNERSEAL PLAIN	3.00

CORMACK PAIL FITTINGS

- Tri-Sure® Pail Fitting Closures for light containers enable packers of metal pails and drums to choose from a variety of Nozzles, Pourers, Innerseals, Screw Caps and Assemblies, so that the packer is assured of obtaining the most advanced and efficient closure for every type of product and package.
- Designed to give products packaged in pails or drums the greatest possible protection, and at the same time facilitate filling, pouring and stacking.
- Compliance with the Food Regulations of the Department of Health, and the Australian Code for the Transport of Dangerous Goods by Road and Rail.
- Precision Tri-Sure® dies are available to drum manufacturers for inserting the Tri-Sure® nozzle.

TRI-SURE® 4S CLOSURE SYSTEMS

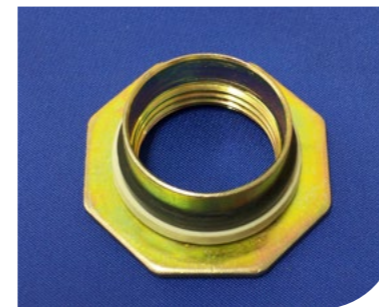

THE TRI-SURE® 4S CLOSURE SYSTEM HAS BEEN DESIGNED TO ENSURE ease of application and optimal security for steel drums. The closures are manufactured in compliance with ISO-15750. Extensive testing, including drop tests with drums has shown the Tri-Sure® 4S Closure to be leak proof. Even under extreme conditions, the sealing will remain intact. Available in G2" and G3/4" sizes with a wide variety of finishes and executions to suit a wide range of filled products.

TRI-SURE® FLANGES

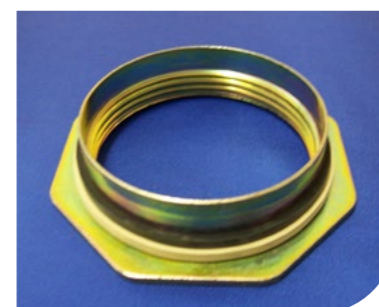

- The Tri-Sure® octagonal steel flange is the very foundation of closure systems for millions of metal containers, forming a unitary joint with the drum stock.
- Unique double washers provide for the ultimate in security.
- The standard product is zinc plated for corrosion resistance, however you can choose from stainless steel, tinplated or phosphated.
- Phenolic and epoxy-phenolic lacquering is also available for extra protection.

G3/4 FLANGES

ITEM NO.	PRODUCT DESCRIPTION	QTY/ CARTON (1,000'S)
TFCA310010	G3/4 FLANGE ZINC DFT 4S	0.50

TFCA214410	G2 FLANGE ZINC DFT 4S RDL 44	0.192

TRI-SURE® STEEL PLUGS

- Tri-Sure® steel plugs, which are thread-rolled to exact specifications, with high torque resistance wrench inserts, save weight without sacrificing strength and are being used worldwide to close and seal millions of metal containers.
- The standard product is zinc plated for corrosion resistance however you can choose from stainless steel tinplated or phosphated mild steel executions.
- Phenolic and epoxy-phenolic lacquering is also available for extra protection.
- Available with a range of Tri-Sure® plug washers including black nitrile, EPDM, polyethylene or viton.

TRI-SURE® TAB SEAL® CAPS

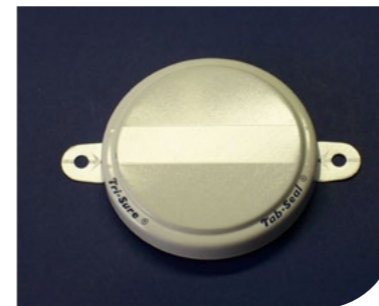

- Tri-Sure® Tab Seal® Caps, with a lowered-in gasket is the most efficient commercial sealing device ever developed for the protection of drum contents.
- Available in metal or plastic and in a variety of colours, with or without customised logos.
- Both the metal and plastic Tab Seal® Cap have been designed to ensure ease of application and maximum security against pilferage or substitution of the drum's contents.
- Tab Seal® Caps are applied using Tri-Sure® manual or pneumatic sealing tools.

G3/4 TAB SEAL® CAPS

ITEM NO.	PRODUCT DESCRIPTION	QTY/ CARTON (1,000'S)
TCA33001	G3/4 TAB-SEAL WHITE	2.50

TRI-SURE® PLASTIC PLUGS

- Tri-Sure® Closure System for plastic containers of precisely formed parts designed to give maximum security from leakage, contamination and tampering.
- Produced from a copolymer of polypropylene or nylon, these plugs provide an excellent quality finish, consistency and high performance.
- All-plastic plugs are available with a range of Tri-Sure® plug washers including EPDM, black nitrile, polyethylene or viton.
- For specific applications, 'umbrella' or 'microporous' venting options are available.

G3/4 PLASTIC PLUGS (B.S.P. THREAD)

ITEM NO.	PRODUCT DESCRIPTION	QTY/ CARTON (1,000'S)
PCIP2013	G3/4 PLASTIC PLUG EPDM (S) VENT OUT	1.00

TRI-SURE® PLASTIROB® TAP

- Plastirob® dispensing taps are made from low-density polyethylene and are compatible with a wide range of dispensing applications.
- Plastirob® has a tapered B.S.P. thread and top mounted dispensing lever.
- Pour spout of 12mm and 17mm are available (12mm by import only)
- FDA compliant and provides corrosion resistance for use with a wide range of liquids.

G3/4 PLASTIC PLUGS (B.S.P. THREAD)

ITEM NO.	PRODUCT DESCRIPTION	QTY/ CARTON
TRAH30	G3/4 PLASTIROB TAP 17mm - B.P.S.T.	0.50

G3/4 & G2 SambaCap™

- Tri-Sure® SambaCap™ is an all-plastic (polyethylene) over-cap.
- Renowned for its durability and long lasting presentation when exposed to lengthy environmental conditions.
- No tooling necessarily required for application or removal.
- Available in plain, coloured, with or without customised logos.

ITEM NO.	PRODUCT DESCRIPTION	QTY/ CARTON
TCSH300	G3/4 SambaCap™ WHITE	0.50
TCSH200	G2 SambaCap™ WHITE	1.00

TRI-SURE® NECK RING

- Neck rings are not specifically required for all closure systems, however the addition of a neck ring can further improve the performance of steel containers.
- Suited for light gauge metal containers.

G3/4 NECK RINGS

ITEM NO.	PRODUCT DESCRIPTION	QTY/ CARTON
SCNN6170	G3/4 NECK RING	2.00

TRI-SURE® Uni-Grip® SPOUTS

FLEXIBLE POUR SPOUT TYPE CLOSURES that have been designed for small to medium size pails and containers.

60C Uni-Grip®

- The Tri-Sure® 60C Uni-Grip® closure is a flexible pour spout combining a plastic cap and tamper evident bails that can be applied to metal and plastic containers.
- Large, easily accessible gripping bails allow for fast easy operation, together with a second tamper evident ring-pull membrane, when removed allows for maximum drainage.
- FDA compliant and provides corrosion resistance for use with a wide range of liquids.
- These closures are applied using a Tri-Sure® manual or pneumatic crimping-tool.
- For specific applications, venting and/or fluorination options are available.

ITEM NO.	PRODUCT DESCRIPTION	QTY/CARTON
PCIP6301	60C UNI-GRIP	0.50
