PACKAGING**  
A TRICORBRAUN® COMPANY

## ENVIRONMENTAL ACTIONS

### OCTOBER ENVIRONMENTAL FEATURED PRODUCT

**YEOMAN INDUSTRIES HAVE A VERY HIGH STRENGTH INDUSTRIAL BLEACH THAT IS EXCEPTIONALLY GOOD BUT ALSO DEMANDING ON THE PACKAGING THAT CONTAINS IT.**

Yeoman Industries are a well known supplier to Gilmores & Food Stuff's supplying many home brand bleach products in New Zealand.

After many years with the long-established Cormack 38 Talc Filled push turn CR3 caps, they are the first to convert to the all new Cormack Packaging 38 jump closure that is Talc free. Using the latest in Random co-polymer PP resins, this makes the closures 100% all PP for recycling as the talc inners are no longer considered recyclable. Cormack expect to see this trend for change happening rapidly over the coming years and are preparing products to meet the needs of consumers today that are environmentally friendly products, but also very functional.

The new closure has been designed with a much easier way to be gripped by the consumer and will match the all new 38mm Tamper evident version expected to be launched in December 2021.
