## PRODUCT OF THE MONTH

# 110 TVL CAPS AND MATCHING JARS

## THE CORMACK PACKAGING RANGE OF 110 TVL CAPS WITH A WIDE SELECTION OF STOCK JARS.

When you get to such large diameter closures as 110 mm that include a tamper evident band, with most options on the market you need large strong hands to be able to hold the jar in one hand to prevent it turning as your other hand has to span the closure to open it.

The Cormack Patented TVL caps, with their unique sequential opening, gives the lowest opening force of any options in the 110 mm range. A key benefit of a 110 mm closure is the consumer can access the product with a measure scoop.

Our TVL caps and matching jars can be in all colors for quantities of 40,000 units and we can line them in a range of liner options. The 2 common liners we use are the 1.0 mm standard PE foam and the dual lined induction foil with a coated PE foam liner for secondary sealing after opening.

Currently tooled jars available in white HDPE are:

VOLUME CAPACITY	QTY/CTN	CTNS/PALLET	QTY/PALLET
1.0 Litre (Squat)	104		1152
1.2 Litres	120	12	1440
1.5 Litres	40	16	640
1.9 Litres	50	12	600
2.5 Litres	36	12	432
4.5 Litres	36	12	432
5.0 Litres	16	16	256

Stock caps in white and black are in PP to suit stock HDPE Round white Jars.

With a minor change these caps can be made to also suit PP and PET containers subject to volume.

**Please contact our internal sales team if you would potentially like to use these packs for your bulk products.**
